

DESTINATION SERVICES

For smaller consignments many clients prefer to collect them from the airport; but we would recommend you to allow us to assist you in providing a customs clearance service.

It is also possible to obtain for you a door to door rate to most worldwide destinations. The normal radius is 0 - 50 miles from the airport; but it is possible to get special rates for destinations further afield.

Please agree the unpacking service prior to forwarding the goods.

If you would like to take advantage of this quick and easy method of sending your goods overseas; please contact your nearest Britannia member on 0845 6006661.

With over 40 offices in the UK Britannia have provided customers with quality moves for over 20 years.

Air Freight with Britannia

Britannia

Removals. Storage and International Shipping

www.britannia-movers.co.uk

PREPARATION

As the UK's largest independent moving group, Britannia has helped tens of thousands of people to move their goods by air overseas. From a single suitcase to the contents of an entire household, Britannia and our partners have the expertise to provide a premier service.

Although smaller packages can be sent individually it is often necessary to overcase items prior to having them airlifted. At Britannia we have modular packing cases designed to fit into standard aircases.

In these days of increasing charges by airlines for excess baggage, many clients find it much more economical to take advantage of Britannia's air freight services.

SECURITY

In many instances it is not always possible to give a final accurate price of the consignment until it has been collected and weighed. This is because the airlines charge on either the final volumetric weight or space; whichever of the two is the greater. Your goods will be forwarded to the airport for onward consolidation, weighing and measuring.

At this point, in order to comply with current air freight security measures your goods will either be placed in an X-Ray machine or decompression chamber* prior to being prepared for onward movement.

It is important that you contact us to ensure you have the correct documentation for the country of your destination.

*A necessary measure that should cause no wear and tear to your goods.

CONTAINERISATION

Your effects will then be forwarded to the airlines or to the airlines handling agent. Prior to this the items will have been containerised into an air igloo (pictured below) or loaded and netted onto giant pallets. Upon presentation of the export documents the necessary customs formalities will be completed and a customs examination may be carried out. When the items have been sent we will be allocated with unique air waybill numbers that will allow us to track your consignment throughout its journey.

By working in partnership with organisations such as DHL, Britannia are able to offer you a service to all major International airports worldwide as well as many regional airports.
